
Organizing DevOps

Ordinance: **Agile Ready Systems**

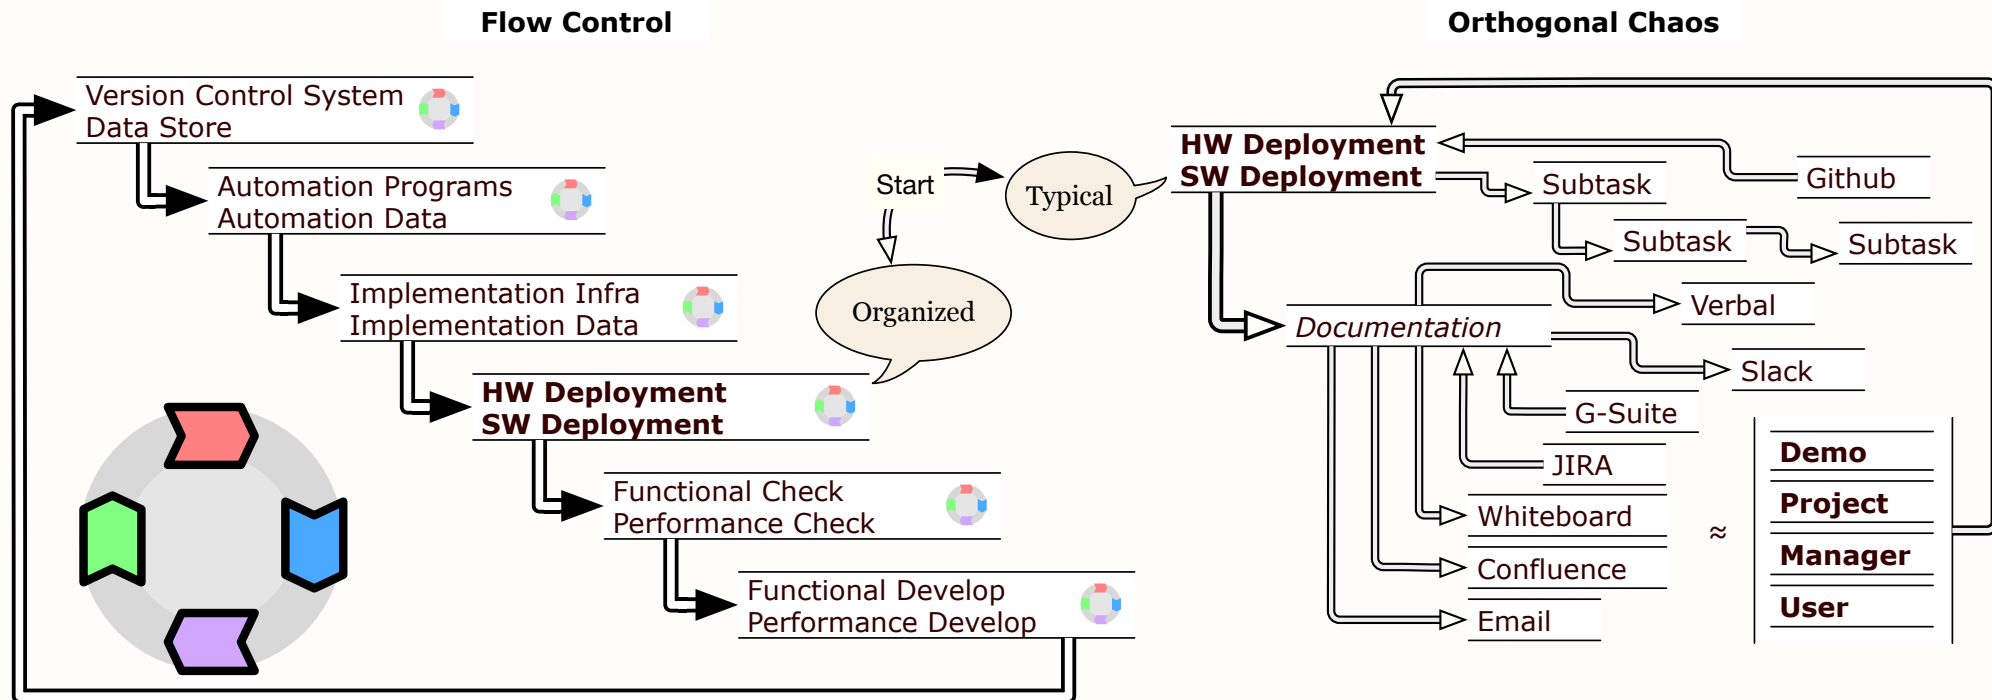

Problem: **Data, Provision, Setup, Documentation, Complexity and Issues scale Exponentially**

Solution: **Process Improvement, Automation, Continuous Handoffs, Dual-Vee Good Automated Manufacturing Practice Hybrid**

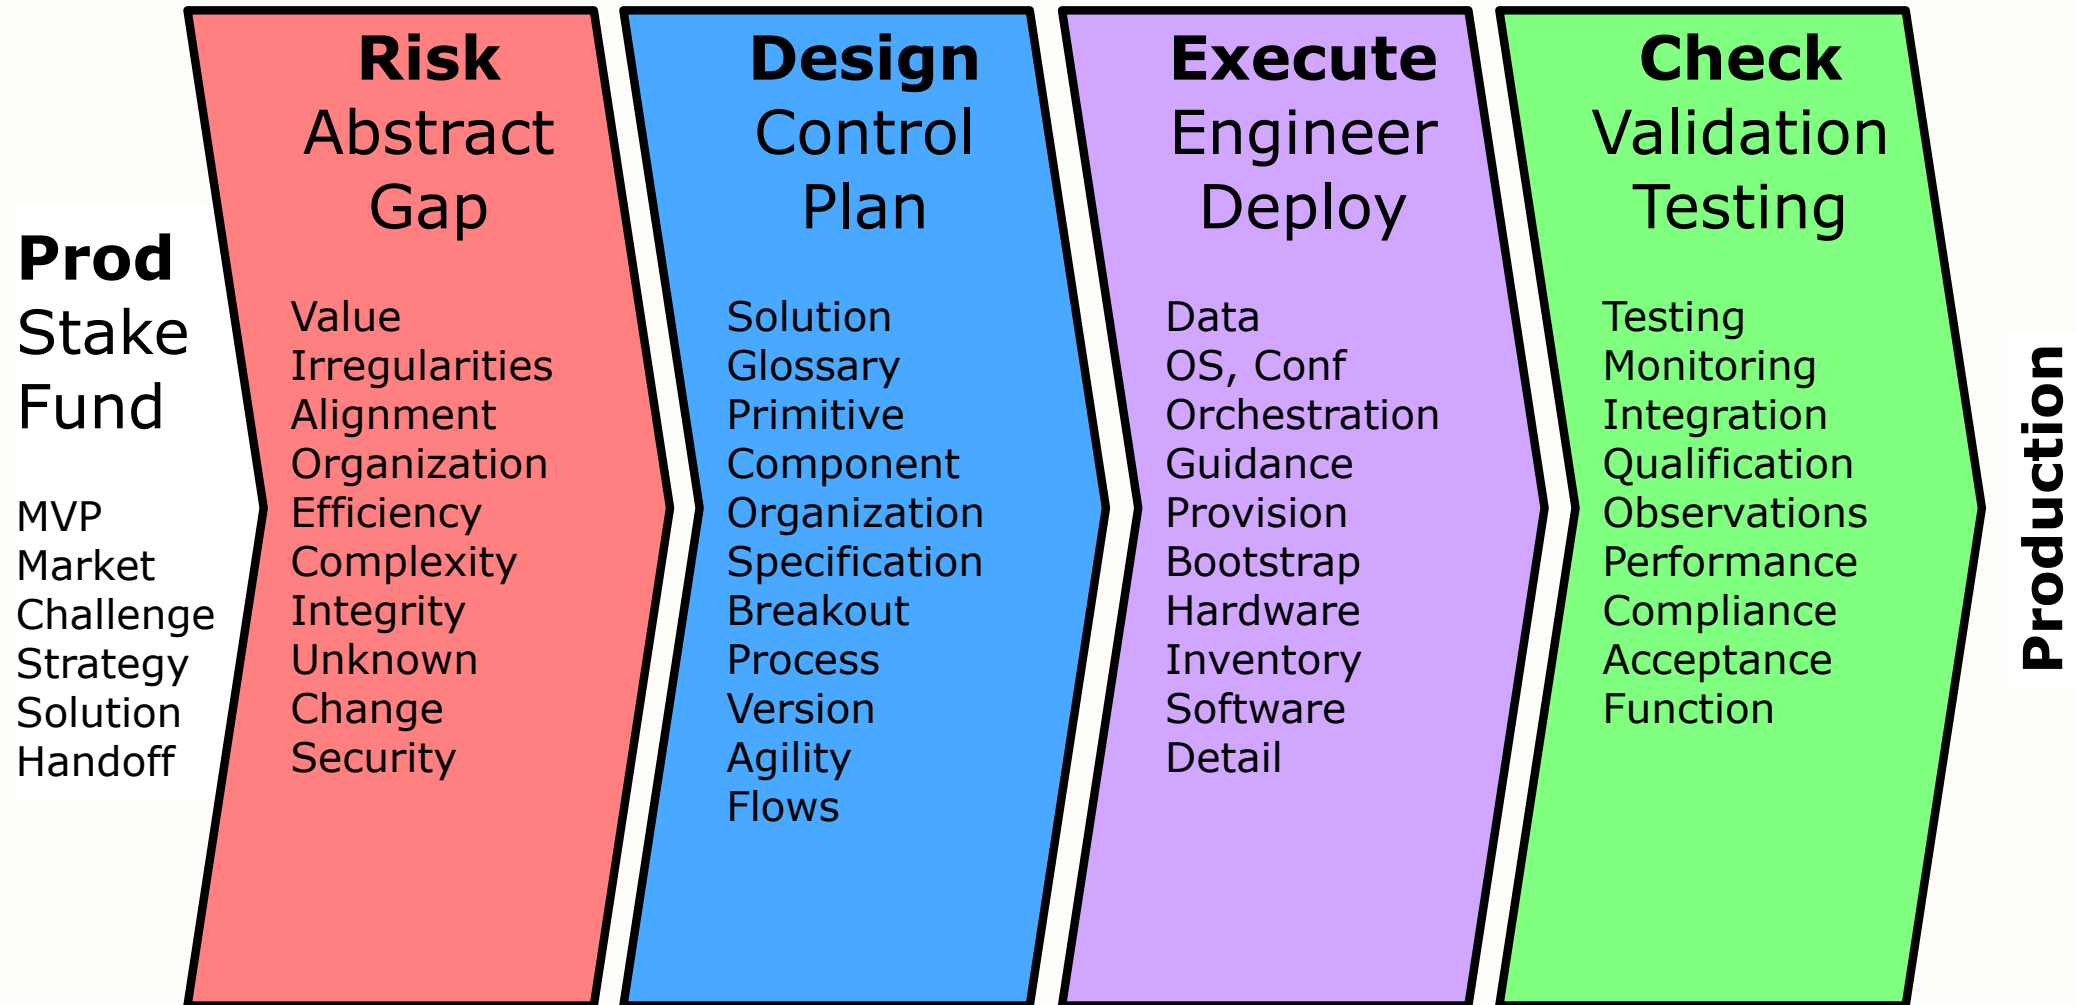

Value: **Quality Integration, Efficient Execution, Incorporated Risk and Design Change Robustness**

Integration and Bootstrap Development

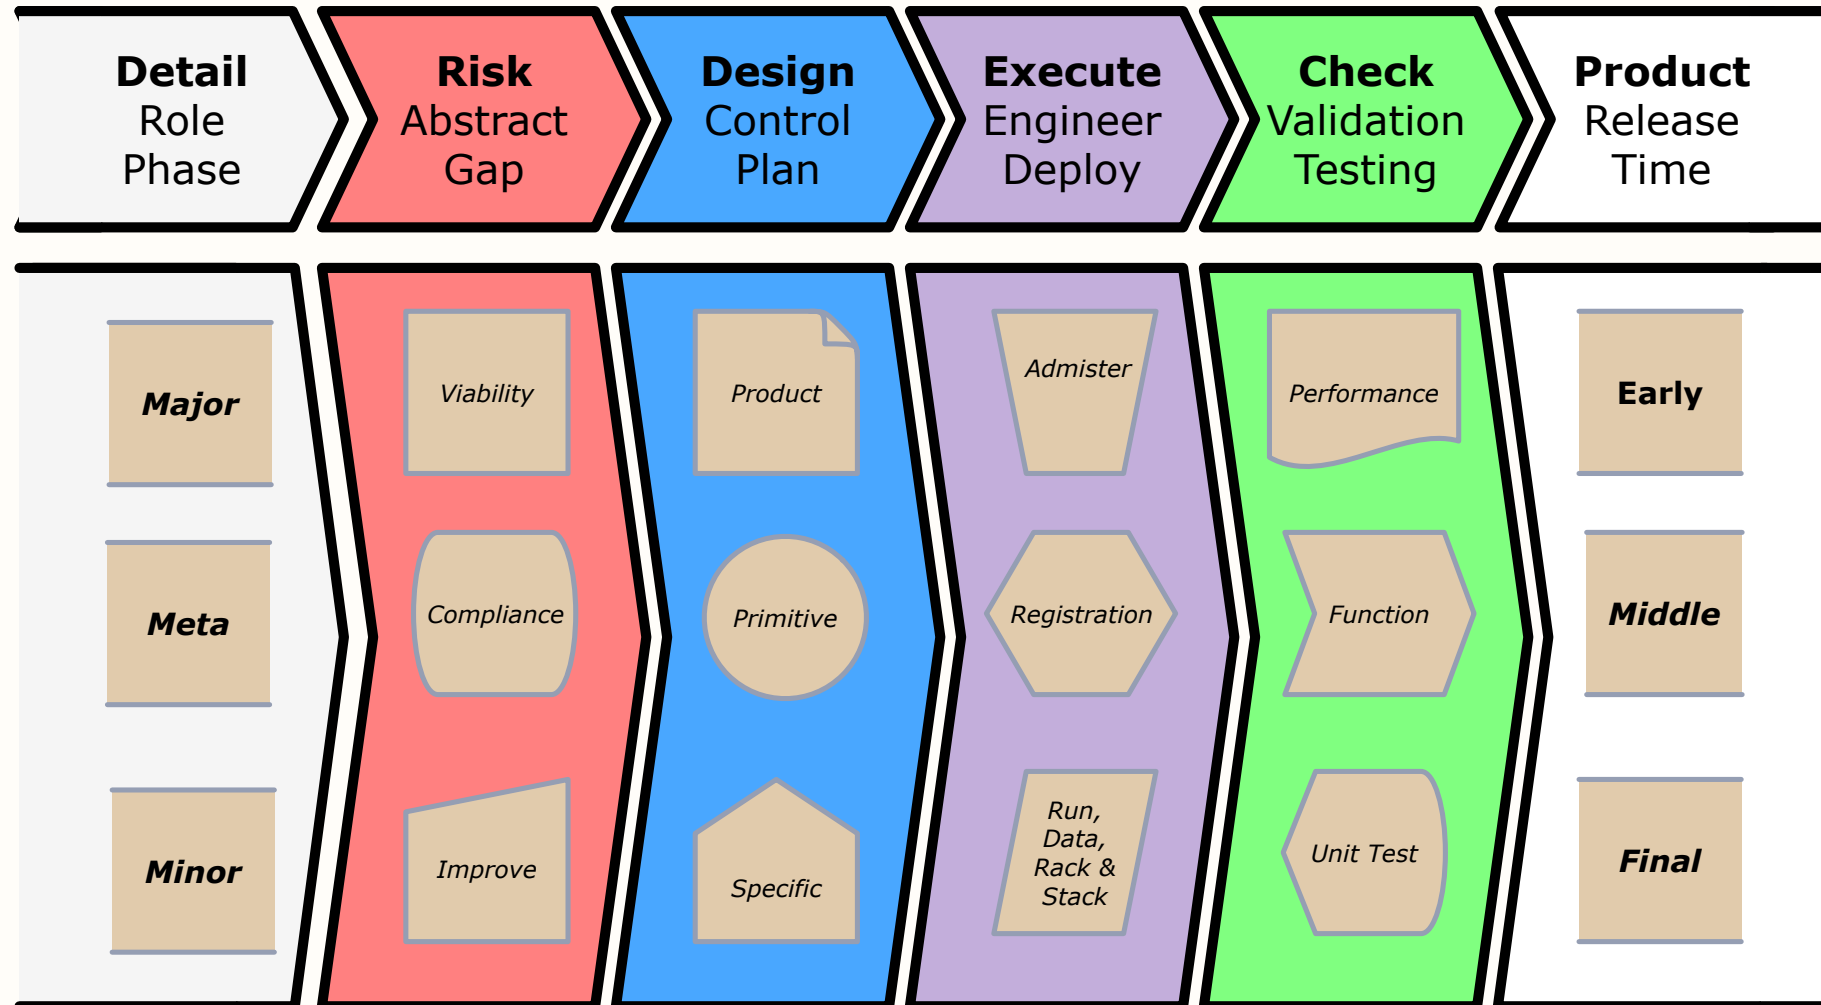

Bootstrap, Flows, Configuration, Performance, Checks

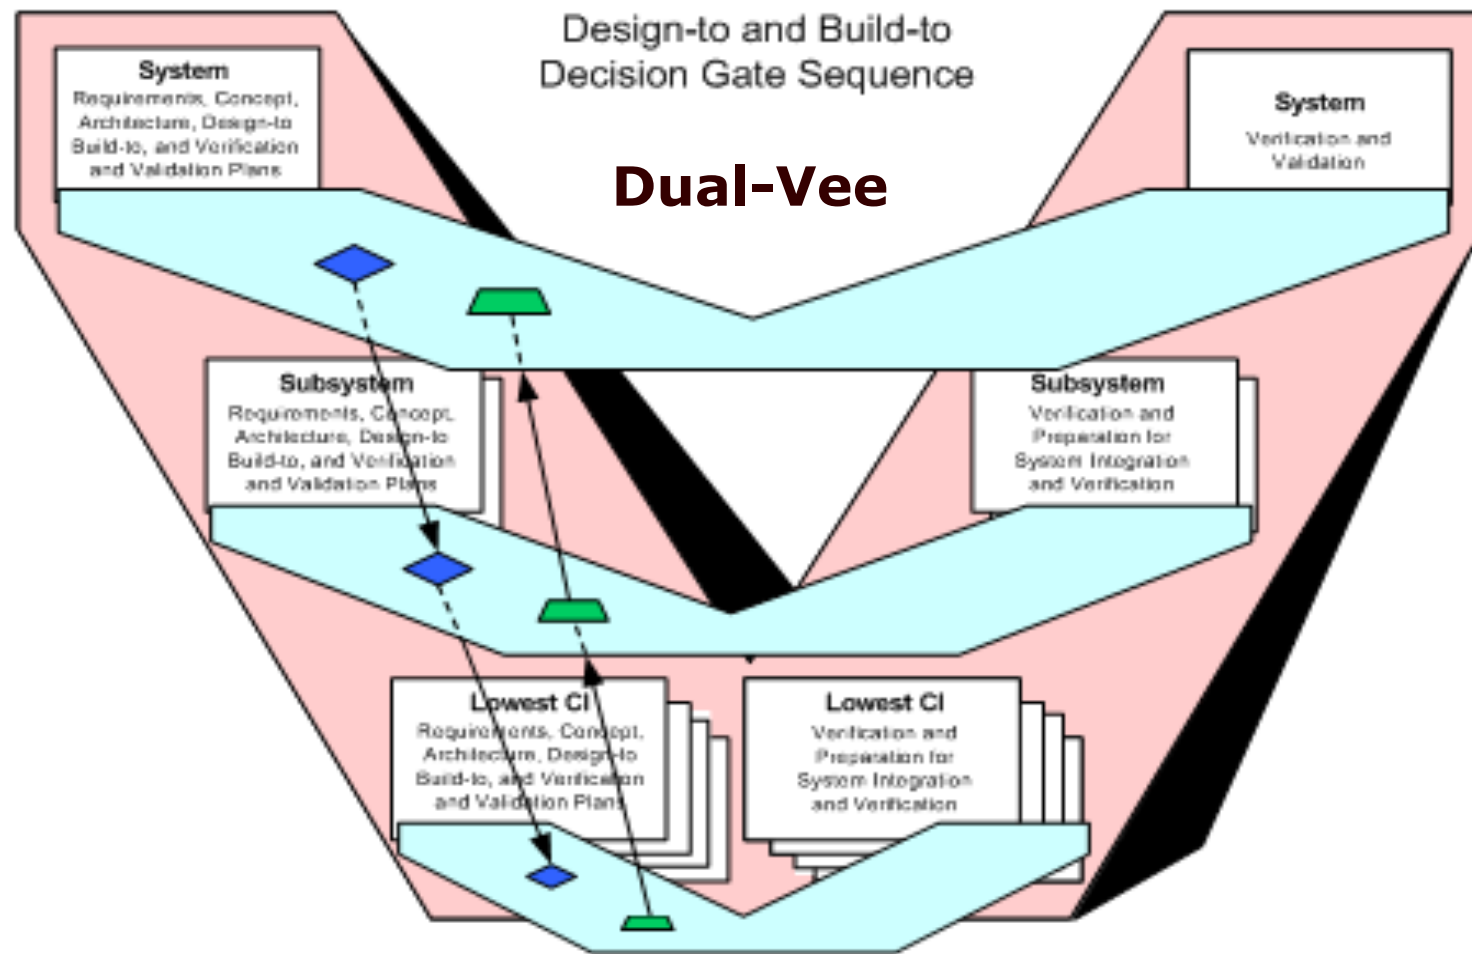

Four Phases of Product Detail

Continuous Railroad

- ◆ Design-to (Preliminary Design Review, PDR)
- Build-to (Critical Design Review, CDR).
