# DevOps

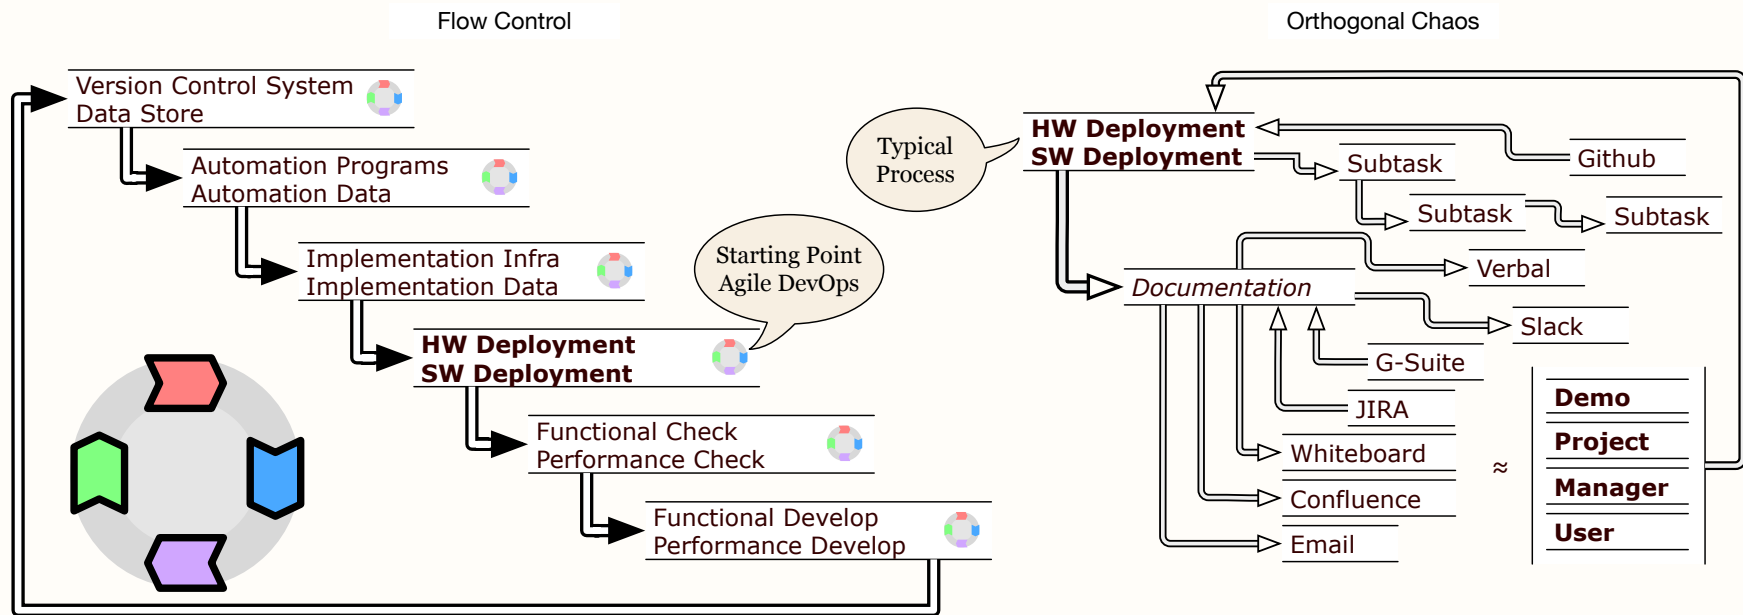

Ordinance: **Rapid Systems Implementation**

Problem: **Data, Provision, Instantiation,  
Management, all scale with Exponential Time**

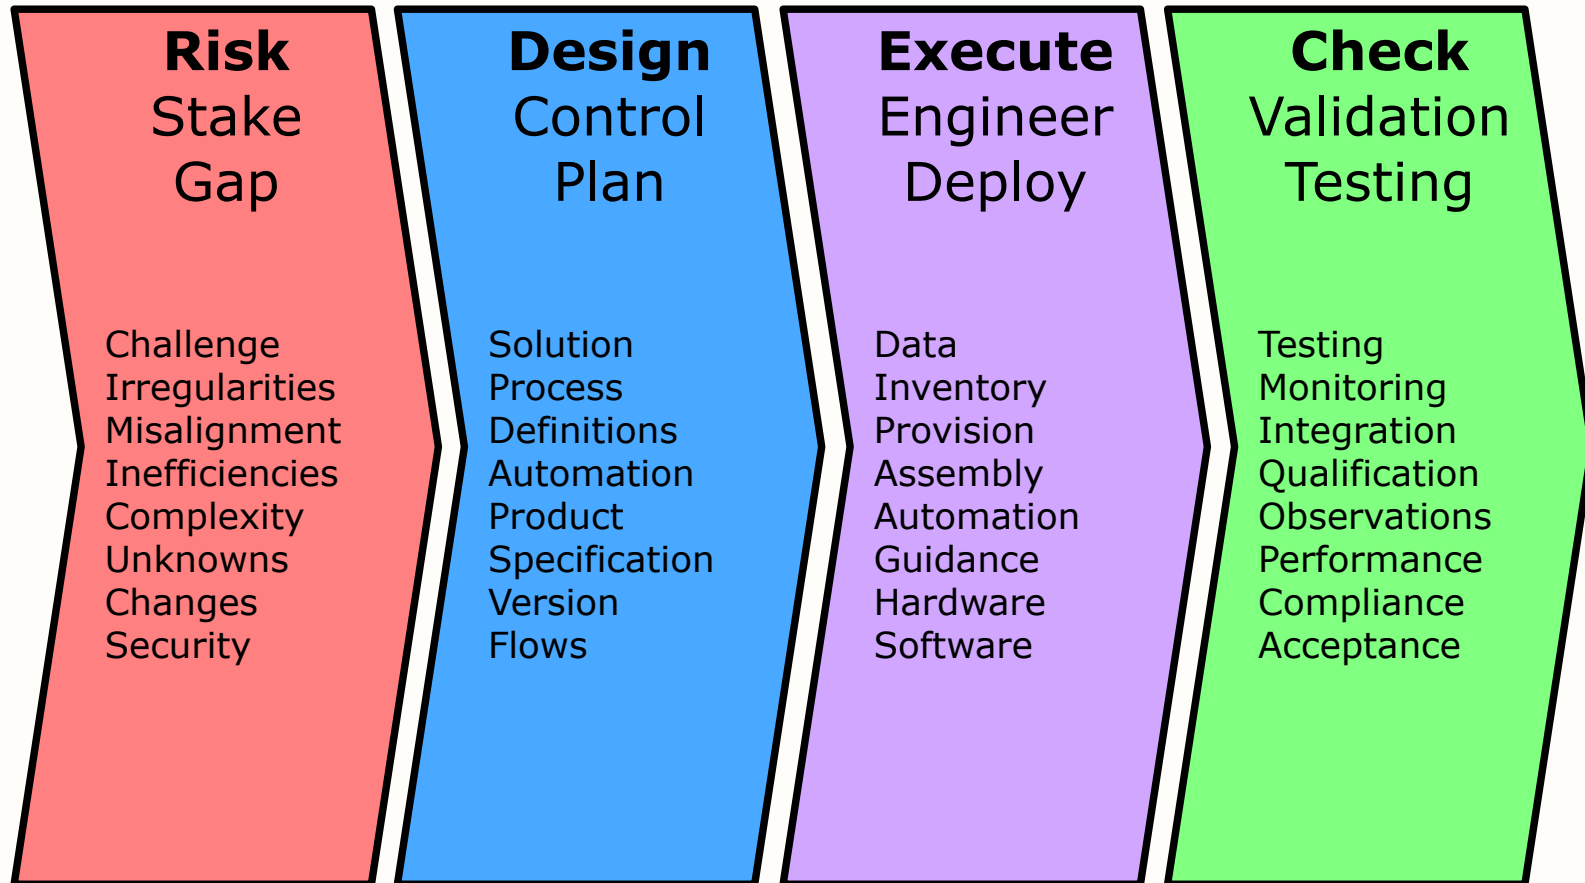

Solution: **Automation for Continuous Deployment,  
Hybrid Dual-Vee Checks, with Good Automated  
Manufacturing Practice**

# Integration and Bootstrap Development

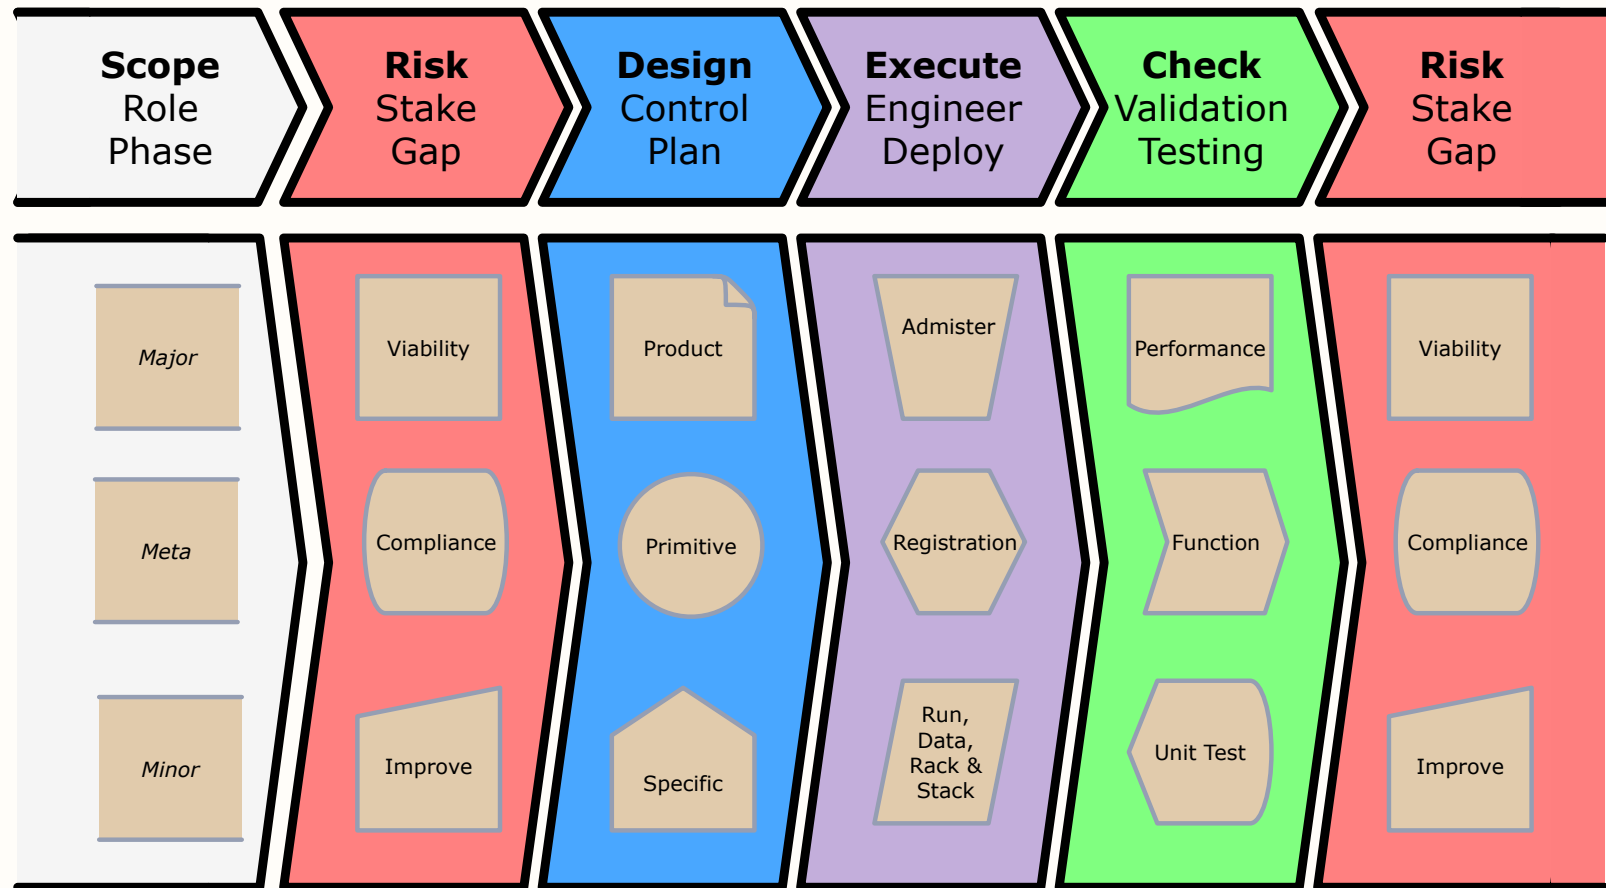

Bootstrap, Flows, Configuration, Performance, Checks

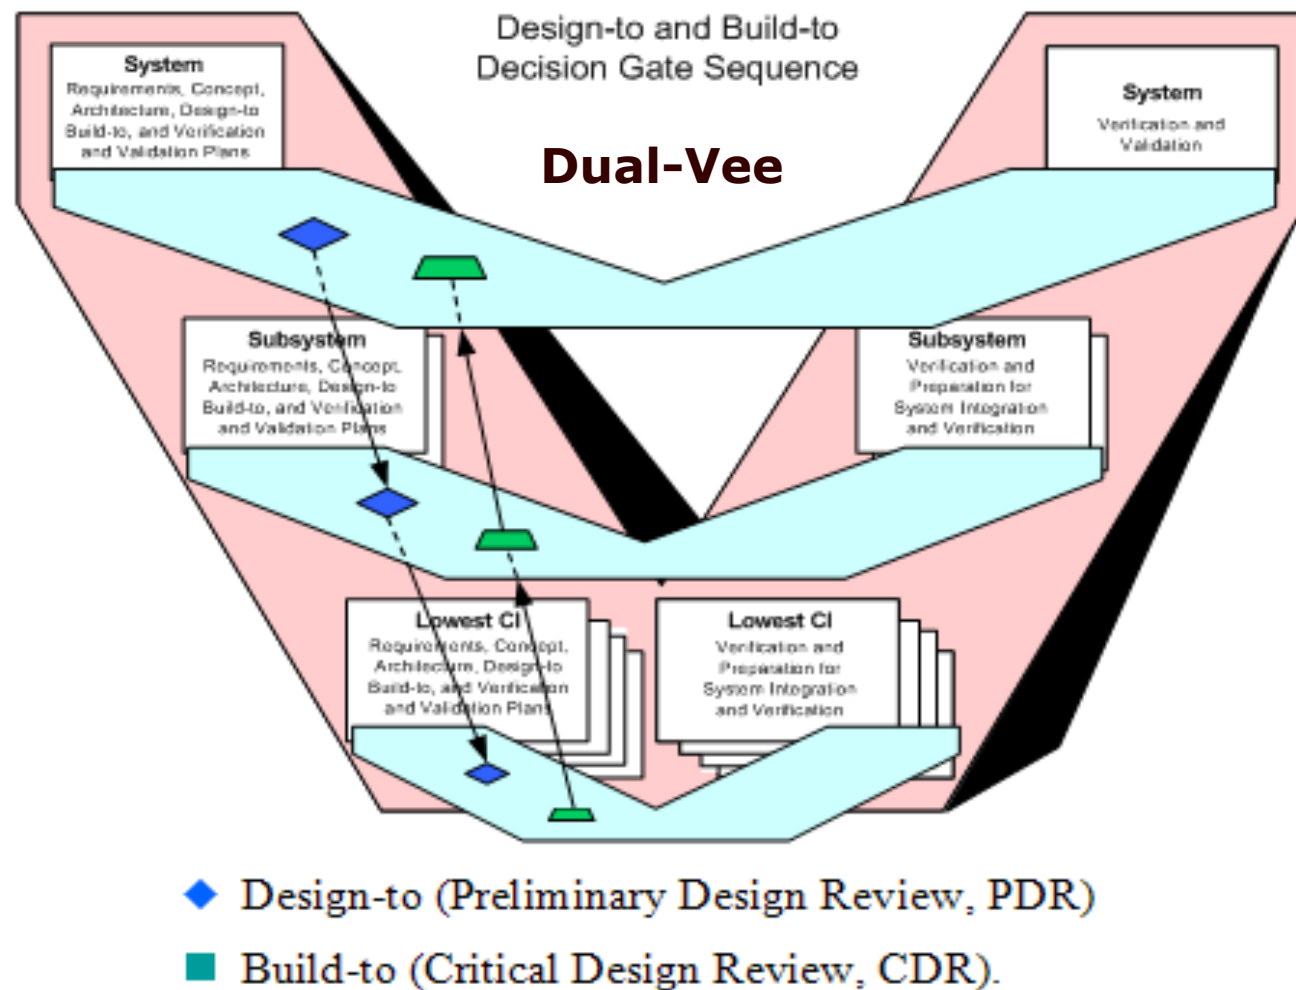

## Four Pillars

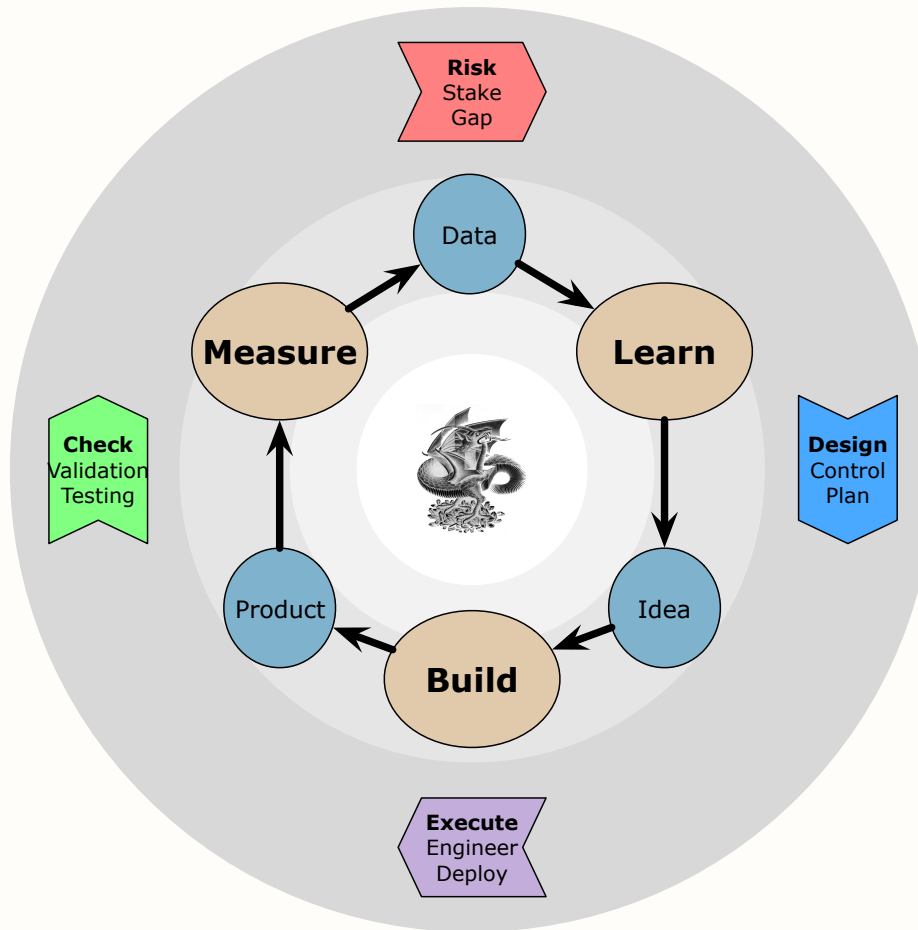

## Continuous Railroad

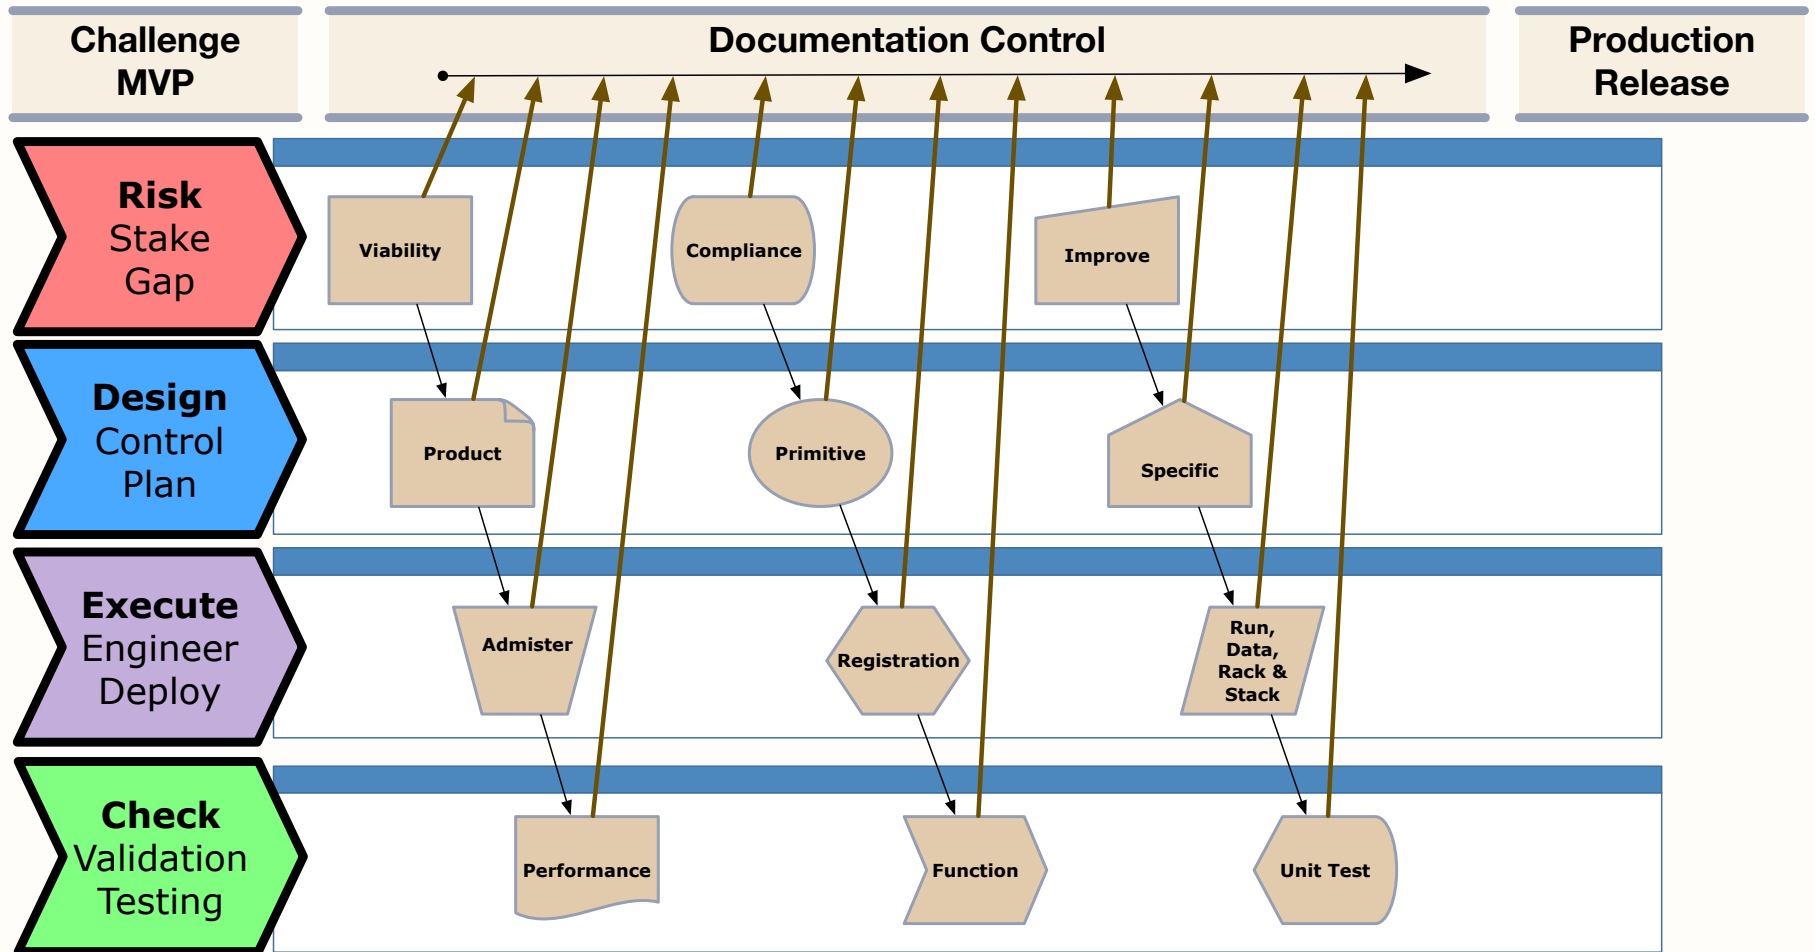

Source: Wikipedia Dual-Vee

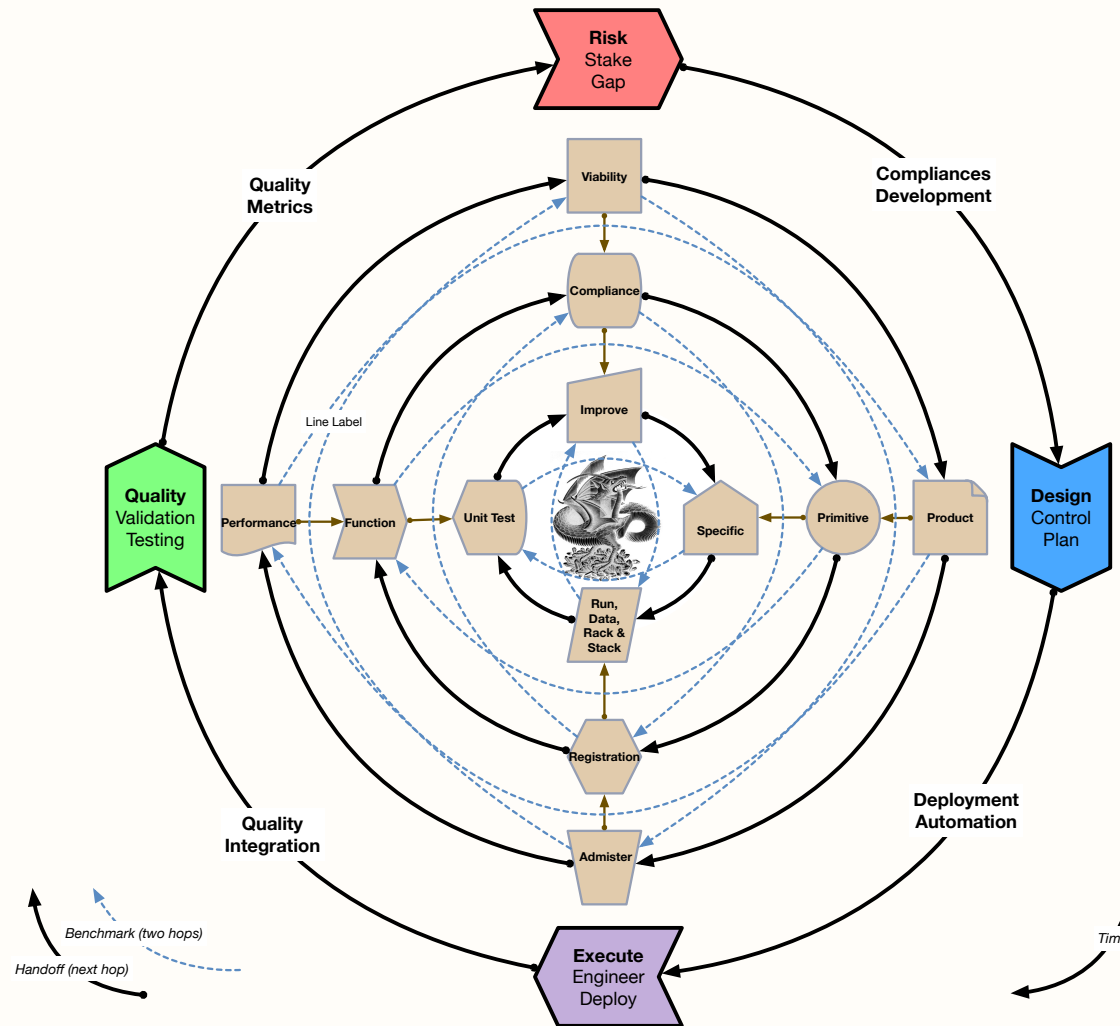

## Feedback Loop

## Simultaneous Swimlanes

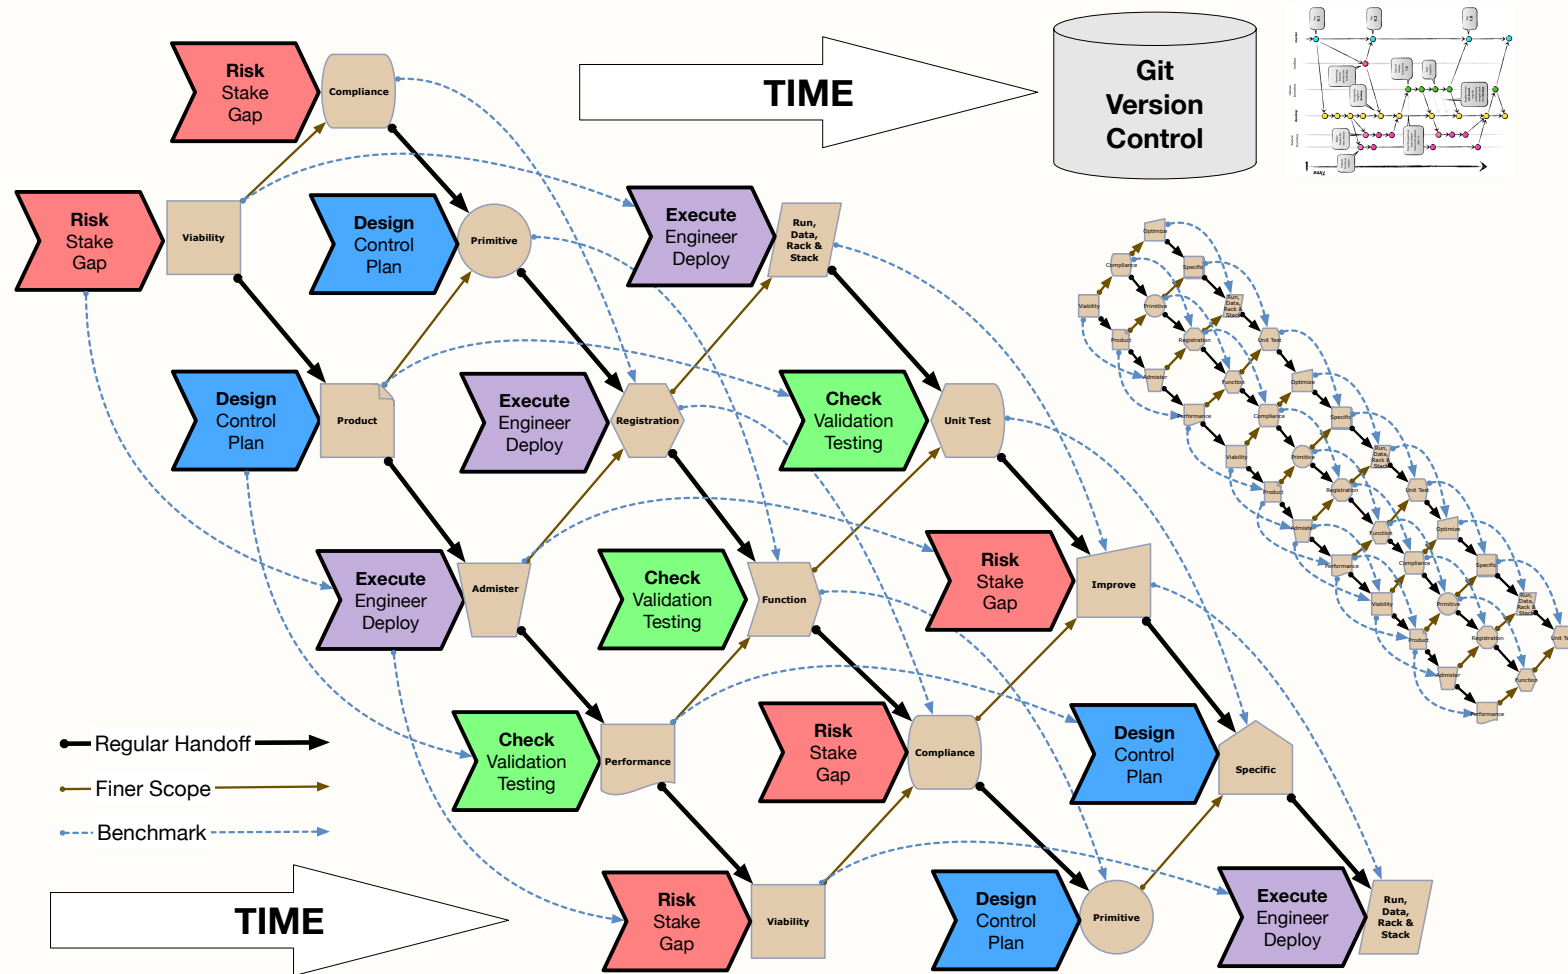

# Cycle of Inputs

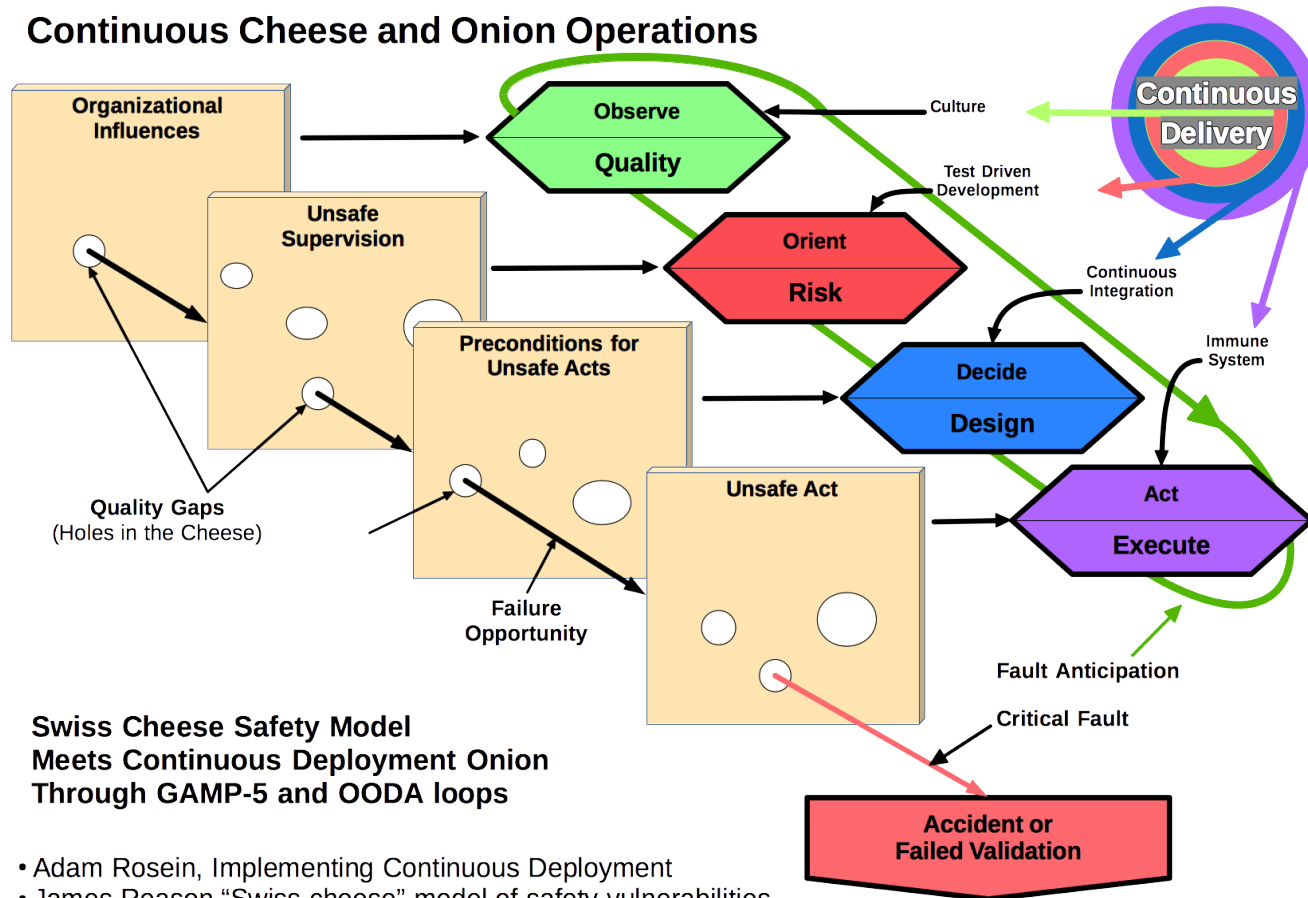

# Entropy of Operational Readiness

## Continuous Cheese and Onion Operations
